EASY AWNINGS • FURNITURE & SHEERS • STYLE TIPS • CAREFREE FABRICS

Come outside and relax

.....
A beautiful and inviting outdoor living space adds extra room for entertaining and relaxing—and for less than you'd think.

STYLE TIP

For an outdoor party, dress up simple place cards with fragrant sprigs of fresh herbs, such as rosemary. Add a cinnamon stick for style and scent.

Expand your home

IT'S EASY TO ADD MORE SPACE to your home, without an expensive remodel. Whether you want to add a safe, sheltered outdoor area for your kids, more room for entertaining, or just your own private retreat, it's all possible—simply by reinventing the space you already have.

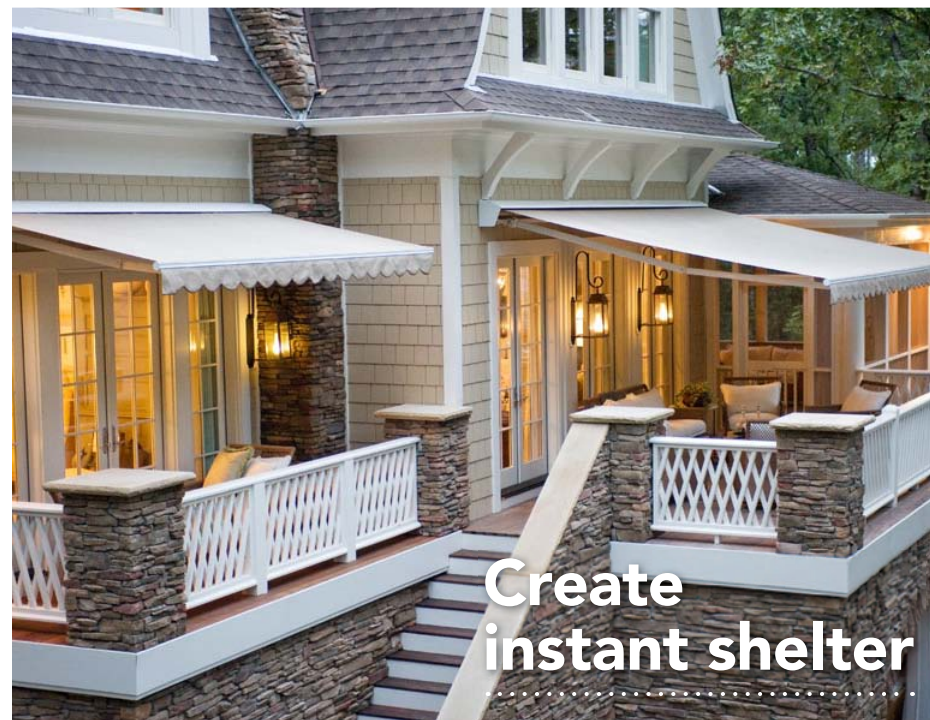

Start by installing a beautiful awning to add shade and shelter, then create intimate seating areas with panels of sheer fabric or umbrellas. Group comfortable furnishings to make inviting areas for gathering and relaxing. Complete your look by adding pretty tabletop decorations for a finishing touch.

Awnings add style and shelter

AN EASY-CARE AWNING made with Sunbrella® fabric is an affordable way to extend the seasonality of your outdoor living space. An awning can create shade in summer, and provide shelter when the season begins to change. Awnings can either have a fixed or retractable design. With the touch of a button, a retractable awning powered by a remote-controlled Somfy® motor can be stored out of the way—perfect when you want more warming sun in winter. In summer, your awning can provide important protection from the sun's rays. In fact, the highly respected Skin Cancer Foundation recommends using awnings, canopies, and umbrellas made with Sunbrella fabric as part of your complete sun protection regimen, along with regular use of sunscreen.

STYLE TIP

Clusters of boldly shaped single plants in striking containers make handsome, surprisingly no-fuss accents. Try succulents, flax, aloe, and bunch grasses.

Create
instant shelter

Simple way to save energy—and money

AWNINGS DO MORE THAN ADD STYLE and space. They can also help you reduce your energy use throughout the year. For example, in warmer months, awnings made with Sunbrella fabric can reduce interior home cooling energy consumption by up to 60 percent. They can also provide sun protection for delicate interior furnishings not made of Sunbrella fabric. In cooler months, retractable awnings let you take advantage of the sun's natural warmth, helping you reduce heating bills and save energy.

Easy-care fabrics

FADE- AND MILDEW-RESISTANT

Sunbrella® fabrics aren't just beautiful, they're designed to stay that way—they resist fading and don't promote mildew growth. Cleaning is easy too. Just use regular soap and water. For tougher stains, it's okay to use bleach—it won't harm your Sunbrella fabric!

STYLE TIP

Float single blossoms, like these richly scented magnolias, in clear glass vases. Stack for a casually elegant look.

Coordinate fabrics for added style

NOW THAT YOU'VE CREATED your sheltered space, add furniture and accessories in stylish Sunbrella fabrics for a pulled-together look. Choose from solids, stripes, and beautiful patterns in a variety of textures. Add decorative pillows and indoor/outdoor rugs and throws also made from Sunbrella fabrics. And don't stop outdoors. Bring these attractive but durable fabrics inside your home too—they make a great choice for easy-care furnishings and accessories.

Let Sunbrella® help you enjoy your outdoor space in style

START CREATING A UNIQUE outdoor living space that matches your style and needs. Let your imagination be your guide—whether you dream of adding a romantic garden retreat, an elegant space for dining, or a relaxed sitting area for family and friends.

Expand your outdoor living space with an awning made of durable Sunbrella fabric. Consider umbrellas, pergolas, and sheers for additional sheltered areas. Add coordinated furnishings and decorative pieces to complete your design and create continuity by using easy-care Sunbrella fabrics inside your home too. For more information on where to find an awning dealer or where to buy Sunbrella fabrics, visit www.outdoorspaces.com or www.sunbrella.com.
